Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The main reason for allowance of claims 1-7 is that the prior art does not show or make obvious a capacitive electromagnetic flow meter as shown in claims 1 and 3. With respect to claim 1, applicant discloses a capacitive electromagnetic flow meter wherein a value of an electrostatic capacitance formed between a pair of face electrodes and guard electrodes is smaller than a value of the electrostatic capacitance between the fluid to be measured and said face electrodes. With respect to claim 3, applicant discloses a capacitive electromagnetic flow meter wherein a coil fixing plate and a cylindrical yoke have both ends cut away in a direction of said tube axis, in a shape of a line where a central axial plane of a flux that intersects orthogonally a center of said tube axis intersects a periphery of said cylindrical yoke. This limitation in combination with other limitations of the claims renders this case allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
